

Iacopo Pacini

Computer Engineering student(M. Sc.)

- ▶ 03/01/1996 in Tuscany
- ▶ italian
- ▶ unmarried

Skills

Software development

Cyber security

Web development

FPGA programming

Linux

Italian L1

English B2

Biography

My name is Iacopo Pacini, I was born in Italy in 1996 and I am currently attending the M.Sc. in Computer Engineering at the University Of Pisa. I have been a computer enthusiast since when I was 12, when my parents bought our first home computer. I remember spending hours clicking on every icon I used to find and exploiting every possible feature of the programs installed on the machine just to discover what action they would trigger. Growing up I realized that the IT area is vast and full of exciting topics, so I enrolled the B.Sc. of Computer Engineering at the University Of Pisa where four years later I obtained the degree. During my university period I particularly developed a passion for networking protocols, electronics and the Linux OS. I do not have any particular plans for my future, for now I just want to enhance as much as possible my skills in the field previously cited.

Work experience

Family business | occasional labor

.... - today

Domestic lightning shop
Tuscany

My job consisted in setting-up the point of sales, the store and mostly dealing directly with customers.

Education

10/2015 - 02/2020

Computer Engineering (B.Sc.)

University of Pisa

Bachelor's thesis: "A complete PBC library benchmark on Zolertia Remote device".

Interests

- ▶ Flautist
- ▶ Cooking
- ▶ Gardening
