# Iacopo Pacini

Computer Engineering student(M. Sc.)
- ▸ 03/01/1996 in Tuscany
- ▸ italian
- ▸ unmarried

## Skills

Software development

**Cyber security**

Web development

FPGA programming

Linux

Italian L1

English B2

Biography

My name is Iacopo Pacini, I was born in Italy in 1996 and i am currently attending the M.Sc. in Computer Engineering at the University Of Pisa. I have been a computer enthusiast since when I was 12, when my parents bought our first home computer. I remember spending hours clicking on every icon i used to find and exploiting every possible feature of the programs installed on the machine just to discover what action they would trigger. Growing up I realized that the IT area is vast and full of exciting topics, so I enrolled the B.Sc. of Computer Engineering at the University Of Pisa where four years later i obtained the degree. During my university period i particularly developed a passion for networking protocols,electronics and the Linux OS. I do not have any particular plans for my future, for now i just want to enhance as much as possible my skills in the field previously cited.

Work experience

Family business | casual labor .... - today
Domestic lightning shop
Tuscany

My job consisted in setting-up the point of sales, the store and mostly dealing directly with customers.

Education

10/2015 - 02/2020

Computer Engineering (B.Sc.)

University of Pisa

Bachelor's thesis: "A complete PBC library benchmark on Zolertia Remote device".

Interests

▸ Flautist
▸ Cooking
▸ Gardening
